Math Week 3 Summer 2

Last week you went over areas of learning that had been taught already in class. This week you will put your learning to the test!

Monday: Complete any areas of work that were not able to be completed over the previous week. There was allot of work and the goal was to go as far as you could with each task - not to have to complete each task. If you did complete it all (well done!) and continue with Mathletics tasks.

Tuesday: Reasoning Test 2a paper. Set yourself an hour to do this.

Wednesday: Go through your paper with the answer sheet. Re-look at the questions you did not get right and see if you can approach them again - giving yourself more time to go through them. - giving yourself more time to go through them as well as using aids to help you (internet, calculator, peer buddy-up on social media, emailing teacher)

Thursday: Reasoning Test 2b paper. Set yourself an hour to do this.

Friday: Go through your paper with the answer sheet. Re-look at the questions you did not get right and see if you can approach them again - giving yourself more time to go through them as well as using aids to help you (internet, calculator, peer buddy-up on social media, emailing teacher)
