Literacy Task 2 (Two-day task).

You will write a diary entry as Harold Carter and when he discovered Tutankhamen’s tomb. Read the information below and write down the important detail (When, who, what, where). After you complete your plan, you need to write the diary entry with all the features you identified in task 1.

November 4th 1922
1) The most strange incident occured this morning. I was with the water boys, who were sorting the water jars, and my labourers. One of them heard a clattering sound. Instantly, they began to dig to see what the noise was.

2) Towards sunset, we had cleared the 12th step of around 20, which was enough to show a doorway. This was enough evidence for us to know it was the entrance of a tomb. The doorway was sealed, which suggested that it had never been opened.
Week 3- Modelling page for plan

**November 14th 1922**

3) A few days later, Lord Carnarvon, Lady Evelyn and Callender arrived, as they wanted to see my discovery. We cleared 9 metres of brick and we found a second doorway. I was shocked to see that it was broken and I wondered if tomb robbers had been here before. I was nervous that the tomb would be empty after all.

**November 25th 1922**

4) A week later, we all went back to the doorway. I made a small hole in the corner of the door and put an iron testing rod through it, to see how far it could reach. I then inserted a candle through the hole, to test if there were any foul gases. The candle flickered a little, but it was okay. Lord Carnarvon, Evelyn and Callender were all excited. I peered in the hole and I saw gold everywhere. Gold statues, gold animals, gold, gold, gold!

5) Seconds later, I peered again through the hole and I saw there was another chamber. We all chipped away the plaster and picked out the small stones. This made a hole big enough for a torch. Its light revealed a solid wall of gold. I gasped with shock. Had I discovered the tomb of Tutankhamun?
